by William J. Wright, Pittsgrove, New Jersey

Western Star trucks were designed for hauling in the western portion of the US and Canada. Owned by White, the company began building Western Stars in 1967 at Kelowna, BC. After Volvo purchased White, Western Star became an independent company based in Canada. Western Star moved production to Portland, OR, in 2002, and is now headquartered in Redford, MI, a subsidiary of Daimler Trucks.

Western Star with Caterpillar engine photographed at a truck show in Secaucus, NJ. July 1986.

Western Star with 6 X 4 Summit Steel body photographed at Englishtown, NJ. August 1988.

Western Star running for Midwest Emery Freight photographed at the 76 Truck Stop in Paulsboro, NJ. December 1984.

Western Star with Cummins engine, Unit #8710, CAST North American Truck Lines of Montreal, Quebec, photographed at Linden, NJ. April 1987.

Western Star pulling a Trailmobile reefer for Shafer Refrigerated Lines photographed at Vineland, NJ. August 1986.

White Western Star 4 X 2 hauling for Inland Express of Philadelphia, PA, photographed at a New Jersey Turnpike rest area. September 1987.

Above: Western Star with 400 Caterpillar engine and 15-speed transmission pulling for Equipment Express of Canada, photographed at Paulsboro, NJ. September 1987.

Left: Robert Ward of Davenport, IA, sent this photo of an International Transport rig after reading Michael Hubert's story about that company. It is a late 1960s Western Star, No. 6901, which made it a Canadian Division rig. Robert photographed it at the Iowa 80 Truckstop in Walcott, IA. [Instead of running it with Robert's letter on page 2, we thought it made a nice addition to the Western Star photo gallery.—SSS]
